UNIVERSIDAD DE GRANADA

FQM-297.
Environmental, Biochemical and Foodstuffs Analytical Control Research Group

Presentation

FQM297 research group was founded by Prof. Fernández Gutiérrez in 1996, after the retirement of Prof. Román Ceba and the disappearance of his research group (Toxicological and Nutritional Analysis). Thus, the FQM297 group continued with the intense work of Prof. Román in the development of luminescent methods and, in addition, incorporated to its research lines the development of optical sensors, new materials for the selective extraction of compounds and the metabolomic study of food, which defines the main mission of this research group: basic and applied research in Analytical Chemistry for the resolution of real problems in the environmental, biomedical and food sectors.

Data:

- **Code:** FQM297
- **Denomination:** Environmental, Biochemical and Nutritional Analytical Control
- **Institution:** University of Granada
- **Head researcher:** Dr. Jorge F. Fernández Sánchez

DEPARTMENT OF ANALYTICAL CHEMISTRY
